647-648-7850

Experience

FlashStock

Sep 2015 - Dec 2015

Web Developer

- Implemented new features for three production web applications using the MEAN stack
- Developed a feature that allows administrators to generate a 5x5 grid of images that can be rearranged, panned, and downloaded without loss of quality or resolution, reducing the time spent from 1 hour to 5 minutes
- Created an algorithm which sped up the process of curating images by 25% via comparing submitted images with accepted images and hiding unacceptable ones

Department of National Defence

Jan 2015 - Apr 2015

Mobile Developer

- Developed a gamified version of the 'Dual N-back' cognitive task that is used by the Canadian Armed Forces to enhance their fluid intelligence and working memory
- The 'Dual N-back' game was created for both Android and iOS as 1 of 7 apps for Mental Health Canada, 6 of which I designed or revised

Scotiabank

May 2014 - Aug 2014

Database Analyst

- Refactored the department's website to decrease the amount of navigation and wait time
- Upgraded department's servers and databases to be compatible with Windows 7
- Automated process of creating multiple reports using PHP and VBA

Projects

Music Popularity | AngularJS, NodeJS

- A web application that is used to search through YouTube views and Spotify play counts to determine the popularity of a certain song, album, or artist.

Personal Website | AngularJS, NodeJS

- A website built to showcase my projects, an interactive resume, and an awesome about me page.

Memory Game | JavaScript

- A modification of the popular Simon Says game with multiple levels and various visual stimuli that can be used to increase memory retention.

Pedometer App | Java, Android

- Manipulated the sensors of a Galaxy Nexus phone in order to calculate acceleration and position to create a pedometer.
